6. YOUR SUMMARY CARE RECORD

Your summary care record is an electronic record of your healthcare history (and other relevant personal information) held on a national healthcare records database provided and facilitated by NHS England.

This record may be shared with other healthcare professionals and additions to this record may also be made by relevant healthcare professionals and organisations involved in your direct healthcare.

You may have the right to demand that this record is not shared with anyone who is not involved in the provision of your direct healthcare. If you wish to enquire further as to your rights in respect of not sharing information on this record then please contact our Data Protection Officer.

To find out more about the wider use of confidential personal information and to register your choice to opt out if you do not want your data to be used in this way, please visit www.nhs.uk/my-data-choice.

Living Well Partnership

Note if you do choose to opt out, you can still consent to your data being used for specific purposes. However, if you are happy with this use of information you do not need to do anything. You may however change your choice at any time.

7. CARE AND HEALTH INFORMATION EXCHANGE (“CHIE”)

Care and Health Information Exchange (CHIE) formerly known as the Hampshire Health Record or HHR, is an electronic summary record for people living in Hampshire, Portsmouth and Southampton.

In order for different parts of the health and care system to work together to provide you with the support you need the CHIE stores summary information from these organisations in one place so that, with your consent, professionals can view it to deliver better care to you.

This record contains more information than the Summary Care Record, but is only available to organisations in Hampshire.

Records on CHIE are held with clear NHS numbers and other identifiers required to locate information to deliver to professionals in support of treatment and care. The primary purpose of the CHIE is to provide clinical and care professionals with complete, accurate and up-to-date information when caring for patients like you.

In addition to ensuring that people who care for you have access to the right level of summary information CHIE also analyses trends in population health through a database called Care and Health Information Analytics (CHIA). This is called ‘secondary processing’. CHIA is a physically separate database, which receives some data from CHIE but all of the data used in this way has been ‘pseudo-anonymised’ – this means names, initials, addresses, dates of birth and postcodes have all been removed.

It is not possible to identify any patient by looking at the ‘pseudo-anonymised’ data on the CHIA database. People who have access to CHIA do not have access to CHIE.

If you object to your information being processed or stored on CHIE it can retain just enough information about you to ensure that the restriction is respected in future. You can ask to restrict processing to direct care (data not transferred to CHIA) only or completely (data not visible in CHIE or CHIA).

If you wish to enquire further as to your rights in respect of not sharing information on this record then please contact our Data Protection Officer.

Further details about CHIE are available here: http://www.careandhealthinformationexchange.org.uk/wp-content/uploads/2018/04/CHIE-Review-of-Procedures-Compliance-with-GDPR_V5-1.pdf

8. WHO WE MAY PROVIDE YOUR PERSONAL INFORMATION TO, AND WHY

Whenever you use a health or care service, such as attending Accident & Emergency or using Community Care Services, important information about you is collected to help ensure you get the best possible care and treatment. This information may be passed to other approved organisations where there is a legal basis, to help with planning services, improving care, research into developing new treatments and preventing illness. All of this helps in providing better care to you and your family and future generations. However, as explained in this privacy notice, confidential information about your health and care is only used in this way where allowed by law and would never be used for any other purpose without your clear and explicit consent.

Living Well Partnership

We may pass your personal information on to the following people or organisations, because these organisations may require your information to assist them in the provision of your direct healthcare needs. It, therefore, may be important for them to be able to access your information in order to ensure they may properly deliver their services to you:

- A. Hospital professionals (such as doctors, consultants, nurses, etc);
- B. Other GPs/Doctors;
- C. Pharmacists;
- D. Nurses and other healthcare professionals;
- E. Dentists;
- F. Any other person that is involved in providing services related to your general healthcare, including mental health professionals.

9. OTHER PEOPLE WHO WE PROVIDE YOUR INFORMATION TO

- A. Commissioners;
- B. Clinical Commissioning Groups;
- C. Local authorities (Social Services);

- H. Health Intelligence - The Practice shares your diabetes related data with the Diabetic Eye Screening Programme operated by Health Intelligence (commissioned by NHS England). This supports your invitation for eye screening (where you are eligible and referred by the Practice) and ongoing care by the screening programme. This data may be shared with any Hospital Eye Services you are under the care of to support further treatment and with other healthcare professionals involved in your care, for example your Diabetologist. For further information, take a look at Health Intelligence's Privacy Notice on the diabetic eye screening website: www.desphiow.co.uk
- I. For the purposes of complying with the law e.g. Police, Solicitors, Insurance Companies, NHS Counter Fraud,;

Living Well Partnership

need to contact you to verify your consent before we release that record. It is important that you are clear and understand how much and what aspects of, your record you give consent to be disclosed.

- K. **Hubs** – we provide extended access services to our patients, at hubs across the city and in Hedge End. This means you can access medical services outside of our normal working hours. In order to provide you with this service, we have formal arrangements in place with the Clinical Commissioning Group (Southampton City and West Hampshire) and the providers of the service, Southampton Primary Care Limited and Eastleigh Southern Parishes Network, also known as the “hubs”. This means, the “hubs” will have to have access to your medical record to be able to offer you the service. Please note to ensure that those practices comply with the law and to protect the use of your information, we have very robust data sharing agreements and other clear arrangements in place to ensure your data is always protected and used for those purposes only.
- L. **Local data sharing schemes** – these schemes enable healthcare professionals outside of the surgery to view information from your GP record, with your explicit consent, should that need arise. These schemes are as follows:
- The National Summary Care Record (SCR) – further details above
 - The Care and Health Information Exchange (CHIE) – further details above
 - EMIS Web data streaming (A&E and GP hubs)
 - Remote Consultations (GP out of hours)
 - Aداstra Web Access (GP out of hours)
 - IBIS (Ambulance service)
 - Symphony (Southampton General Hospital)
- M. **Data Extraction by the Clinical Commissioning Group** – the clinical commissioning group at times extracts medical information about you, but the information we pass to them via our computer systems **cannot identify you to them**. This information only refers to you by way of a code that only your practice can identify (it is pseudo-anonymised). This therefore protects you from anyone who may have access to this information at the Clinical Commissioning Group from **ever** identifying you as a result of seeing the medical information and we will **never** give them the information that would enable them to do this.

There are good reasons why the Clinical commissioning Group may require this pseudo-anonymised information, these are as follows:

- To enable the commissioning of services that meet the needs of the population they are serving
- To protect the health of the public
